

Assignment 2: Software Requirements Specification

Team: Pet Chart

Project Title: Pet Chart

Members:

1. Hailey Gillespie
2. Ian Meyer
3. Eder Lopez

Meetings date	Participants
09/18/2024	1, 2, 3
10/05/2024	1, 2, 3
10/19/2024	1, 2, 3
11/02/2024	1, 2, 3
11/16/2024	1, 2, 3
11/30/2024	1, 2, 3
12/14/2024	1, 2, 3

Stakeholders	Requirements
Pet Owners/End Users	FR1: Input information for upcoming appointments FR2: Review past appointments FR3: Manage multiple pets FR4: Input medication history FR5: Review medication history FR6: Input vaccine history FR7: Review vaccine history FR8: Get email notification for upcoming appointment FR9: Get email notification for upcoming vaccinations FR10: Log in with google account FR11: See overview of pets' recent medical activity in "dashboard"

	FR12: Input pet's general information such as name, DOB, breed, etc. on first sign in FR13: Input flea & tick treatment history FR14: Review flea & tick treatment history FR15: Get email notifications for flea & tick treatment reminders FR16: Account settings page
Veterinary Offices & End Users	FR17: Receive email with pet's medical information
All	NR1: Performance, webpages must load within 5 seconds including all queries done NR3: Reliability, emails must successfully send at least 90% of the time NR4: Usability, UI must be easy for non-technically inclined users to navigate NR6: Scalability, must be able to support an increasing number of users over time
Developers	NR2: Security, MongoDB security settings must be configured NR5: Maintainability, code must be well documented

FR1: Input information for upcoming appointments		
<u>Goal:</u> Have a page that a user can go to to input future appointment information for a pet.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> Create a page that a user can go to from their dashboard, on this page the user can input future appointment information including date, time, location, pet, and reason.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 1

FR2: Review past appointments		
<u>Goal:</u> Have a page that a user can go to to see past appointments one of their pets has been to.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> Create a page that a user can go to from their dashboard, on this page the user can easily view, in a sort of list format, past appointment information including date, time, location, pet, and reason.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 1

FR3: Manage multiple pets		
<u>Goal:</u> Allow user to input information for multiple pets		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> There should be a page that users can access from their account settings, that allows them to add a pet to manage information for. They should be able to add as many pets as they want. Information collected for pets should include name, DOB, and breed.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 1

FR4: Input medication history		
<u>Goal:</u> Allow user to INPUT what medications a specific one of their pets has taken/is on currently on.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> There should be a page that users can access from their dashboard, to input medication information. This should look like a form. Information collected should include medication name, dosage, prescribing vet, and duration taken.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 2

FR5: Review medication history		
<u>Goal:</u> Allow user to VIEW what medications a specific one of their pets has taken/is on currently on.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> There should be a page that users can access from their dashboard, to view details about all medications a specific pet has taken. Information shown should include medication name, dosage, prescribing vet, and duration taken. Should be formatted like a list.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 2

FR6: Input vaccine history		
<u>Goal:</u> Allow user to INPUT what vaccinations a specific one of their pets has received.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> There should be a page that users can access from their dashboard, to input details about all vaccinations a pet has received, and when the next injection will be needed. Page should be a form. Information collected should include vaccine name, prescribing vet, and expiration date.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 2

FR7: Review vaccine history		
<u>Goal:</u> Allow user to VIEW what vaccines a specific one of their pets has taken, and when the next is due.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> There should be a page that users can access from their dashboard, to view details about all vaccinations a specific pet has received. Information shown should include vaccine name, prescribing vet, and expiration date. Should be formatted like a list.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 2

FR8: Get email notification for upcoming appointment		
<u>Goal:</u> Allow user to enable receiving email reminders for upcoming appointments.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> In account settings there should be slider to enable/disable “appointment email notifications.” If enabled, the user will receive a reminder 1 week and then also 1 day before the appointment via their provided email.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 3

FR9: Get email notification for upcoming vaccinations		
<u>Goal:</u> Allow user to enable receiving email reminders for soon needed vaccinations.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> In account settings there should be slider to enable/disable “vaccination email notifications.” If enabled, the user will receive a reminder 1 month and then also 1 week before the vaccine expires, via their provided email.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 3

FR10: Log in with google account		
<u>Goal:</u> Allow user to log into website via google OAuth.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> When a user signs up for the website, they should be prompted through the google OAuth process, so their google email and key can be used for account management.		
<u>Origin:</u> This is an extension/idea for specific implementation after proposal was made, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 1

FR11: See overview of pets' recent medical activity in "dashboard"		
<u>Goal:</u> When a user logs in, they are shown a "dashboard" with their pet's general information.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> When a user signs in, they should be taken to a dashboard page. On this page all of their pets should be displayed, alongside their most recent medical history including soon upcoming appointments and vaccines, current medications, flea and tick treatment status, name, and age.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 1

FR12: Input pet's general information such as name, DOB, breed, etc. on first sign in		
<u>Goal:</u> The first time a user signs in, they should be prompted to input information for at least 1 pet.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> When a user signs in for the first time, they should be instantly directed to the page to add a pet's information.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 3

FR13: Input flea & tick treatment history		
<u>Goal:</u> Allow user to INPUT what flea and tick treatment a specific one of their pets has received.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> There should be a page that users can access from their dashboard, to input details about a pet's flea and tick treatment (name, dosage, start date, prescribing vet if applicable), and how often to give the treatment. Page should be a form.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 2

FR14: Review flea & tick treatment history		
<u>Goal:</u> Allow user to VIEW what flea and tick treatment a specific one of their pets has had, and when the next dose should be given.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> There should be a page that users can access from their dashboard, to view details about all flea and tick treatment a specific pet has received. Information shown should include treatment name, dosage, date started, and prescribing vet (if relevant). Should be formatted like a list.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 2

FR15: Get email notifications for flea & tick treatment reminders		
<u>Goal:</u> Allow user to enable receiving email reminders for when next flea/tick treatment is due.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> In account settings there should be slider to enable/disable “flea&tick email notifications.” If enabled, the user will receive a reminder 1 week and then also 1 day before the treatment needs redone, via their provided email.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 3

FR16: Account settings page		
<u>Goal:</u> Allow user to change their own account settings for a dedicated page.		
<u>Stakeholders:</u> End Users/Pet Owners		
<u>Description:</u> From the dashboard, users should be able to navigate to this “account settings” page. This page will allow them to manage their own information such as name, email, pets, and notifications.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 1

FR17: Receive email with pet's medical information		
<u>Goal:</u> Allow users to email specific pet information to a veterinary office.		
<u>Stakeholders:</u> Veterinary Offices/Pet Owners		
<u>Description:</u> From the dashboard, users should be able to choose to “share” their pet’s information. This should take them to a page where they select which information to send (which pet, and if include vaccines/medications/appointments), and enter an email address (intended to be the vet office) that it will be sent to.		
<u>Origin:</u> Based on initial project specification document, team members came up with this description during the first meeting.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 3

NR1: Performance, webpages must load within 5 seconds including all queries done		
<u>Goal:</u> Ensure the page loads quickly for the user		
<u>Stakeholders:</u> All		
<u>Description:</u> Ensure that all queries for the page are completed, and all elements load within 5 seconds.		
<u>Origin:</u> Decided during 2 nd meeting for SRS creation.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 4

NR2: Security, MongoDB security settings must be configured		
<u>Goal:</u> Ensure user and pet information is stored as securely as reasonably possible.		
<u>Stakeholders:</u> Developers		
<u>Description:</u> Ensure that all security settings for MongoDB are properly configured.		
<u>Origin:</u> Decided during 2 nd meeting for SRS creation.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 4

NR3: Reliability, emails must successfully send at least 90% of the time		
<u>Goal:</u> Ensure users and veterinary offices receive the emails they are sent almost every time.		
<u>Stakeholders:</u> All		
<u>Description:</u> Ensure that 90% of emails are sent successfully. If an email fails to send, ensure an error is thrown and clearly displayed.		
<u>Origin:</u> Decided during 2 nd meeting for SRS creation.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 4

NR4: Usability, UI must be easy for non-technically inclined users to navigate		
<u>Goal:</u> Make our website easy to use for pet owners of any technical familiarity.		
<u>Stakeholders:</u> All		
<u>Description:</u> Make the UI as simple, clean, and streamlined as possible to ensure it is easy to navigate. Show to outside parties to receive feedback.		
<u>Origin:</u> Decided during 2 nd meeting for SRS creation.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 2

NR5: Maintainability, code must be well documented		
<u>Goal:</u> All code for the website is easy to understand and contribute to.		
<u>Stakeholders:</u> Developers		
<u>Description:</u> Make the UI as simple, clean, and streamlined as possible to ensure it is easy to navigate. Show to outside parties to receive feedback.		
<u>Origin:</u> Decided during 2 nd meeting for SRS creation.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 2

NR6: Scalability, must be able to support an increasing number of users over time		
<u>Goal:</u> Website must be capable of supporting 10 or 1000 users.		
<u>Stakeholders:</u> Developers		
<u>Description:</u> Website and database must be structured to support a growing user base. The number of users and pets should not be limited.		
<u>Origin:</u> Decided during 2 nd meeting for SRS creation.		
<u>Version:</u> 1.0	<u>Date:</u> 10/5/2024	<u>Priority:</u> 4
